

Welcome to the download page for the Human Readable Type.

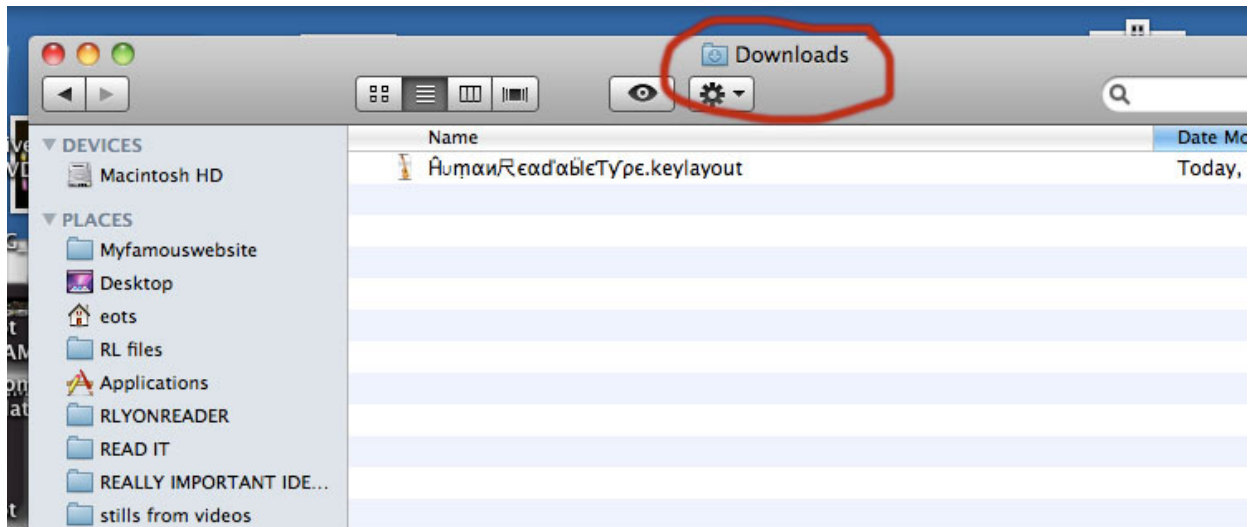

The Human Readable Type is a download and easy to install keyboard plugin that produces human-sounding readable text as you type. What's written this way is intelligible to automatic speech processing and data mining applications. It's for folks who prefer to communicate, etc. It is readable on almost any digital device.

Download the .key file here: HumanReadableType.keylayout

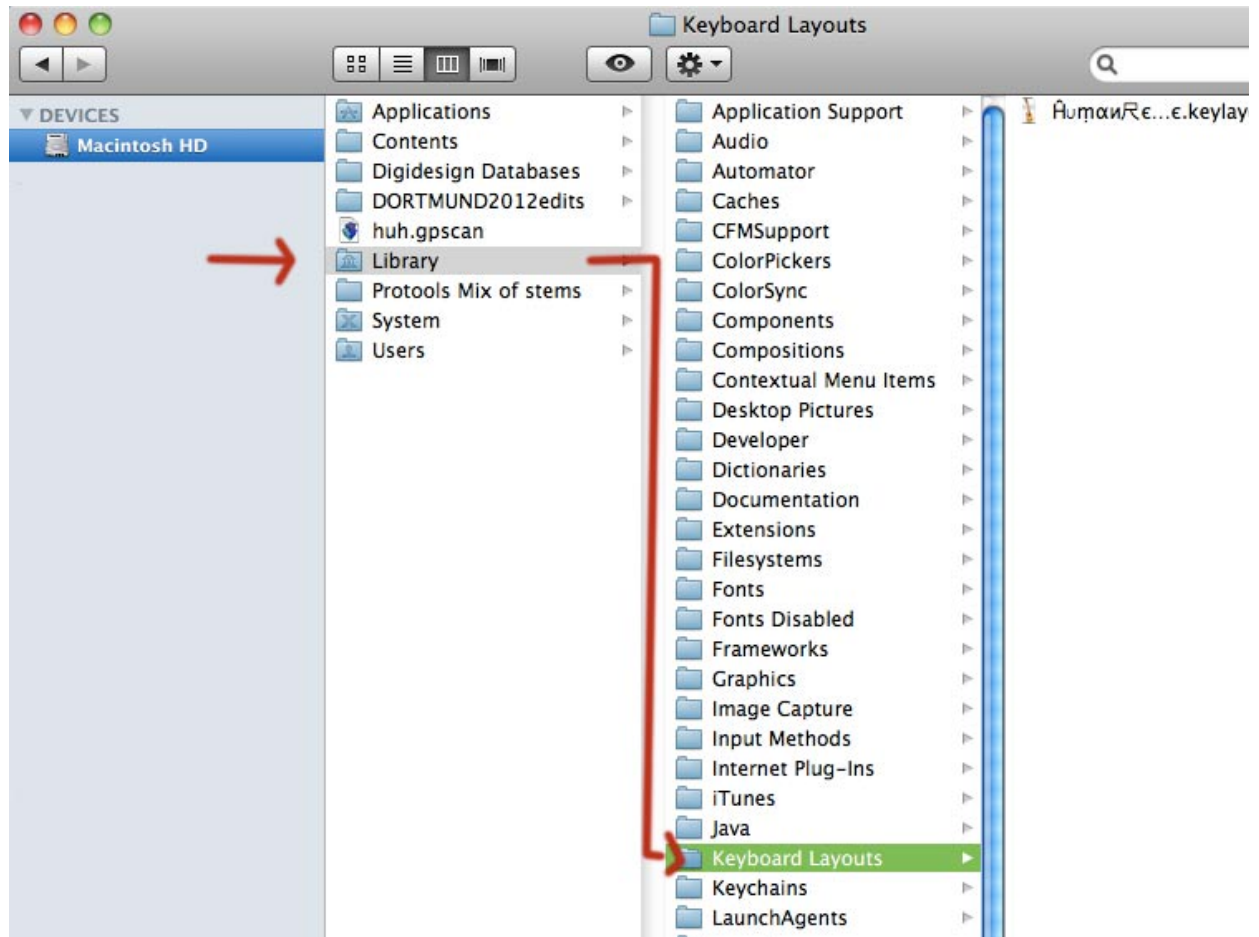

The file is free software, and updates will be posted as they come.

INSTRUCTIONS:

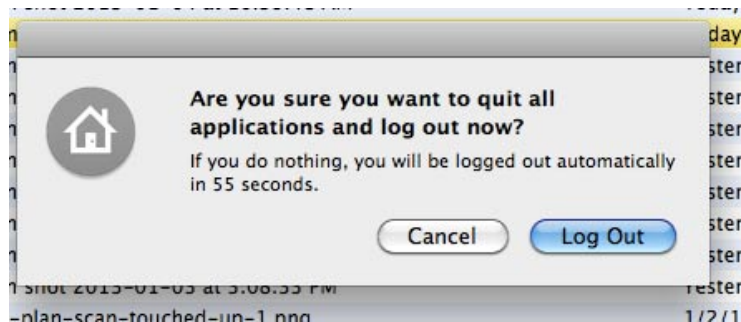

1. Download

2. install file in -> Τη β ΓαΓΥ -> Κεϋ β σαΓδ' Ταγσού§.
